

## Resources For Exam Testing Updated Study Bibliography

Below you will find the 2020 Clinical Anaplastology Study Bibliography. This list of publications is designed to aid in preparing for the certification examination. This reference list reflects texts, articles and resources that were used to validate some of the information during preparation and completion of the 2019 Job Task Analysis for examination test questions. There are obviously other texts that describe anatomy, material science, disease processes, and other necessary knowledge that may be suitable for study but were not used in the creation of exams. The BCCA recognizes that there may be minor variations between credible resources. Pursuant to this, Standard 17 of the NCCA allows for candidates to make challenges concerning scores, validity, or other essential issues. It is not the BCCA's intent to dispute the value of one resource over another but rather to represent the truth about what is required to perform a task competently.
